

A project planner for 4/5 points:

- Choose a topic which interests you.
- Make a project according to the following instructions:

Page 1: A cover page – write the name of your project; your name; ID number; teacher's name; school's name; add a picture of the topic you chose.

Page 2: Table of contents – add the contents of your work with relevant pages.

Page 3: Introduction – introduce your topic, why you chose to write about it and what you plan to learn.

Pages 4-9: body: three research questions about your project.

If, for example, you choose to do a project about a certain country, you can write about its history, food, climate, tourists attractions and so on.

Page 10: Summary – summarize your findings: did you learn something new about your topic?

Page 11: Reflection – write your own opinion about your work: did you improve your English? Did you enjoy making this project? What was difficult/easy for you while doing this project and so on.

Page 12: Bibliography – add 3 or more sites that have helped you research the topic.

Page 13: Appendix - if you have many pictures or articles, you can add them in this section of the paper.

- You can do the project alone or in couples.
- Remember to add pictures.
- Bind your project nicely.
